NBC-Sponsored Unit Assigned Active Duty

The Mobile Radio Broadcasting Company, part of the Army's Organized Reserve, which has been sponsored by the National Broadcasting Company through the Department of the Army's Industrial Affiliation Program, was scheduled at the time this was written to enter active military service May 1, 1951. Its recent activities have been supervised by Major General George L. Van Deusen (Retired), president of RCA Institutes.

The unit is composed chiefly of personnel from NBC and from RCA Institutes. The bulk of these men are specialists in some phase of broadcast communications or programming. The unit is part of a larger organization, which will operate as a psychological warfare group. The commander of the group is Col. Ellsworth H. Gruber of the New York Daily News.

Primary mission of the unit will be mobile radio broadcasting for psychological warfare purposes. The men in the unit will be performing essentially the same type of work they did in civilian life, which will be operation of broadcasting studio facilities and high-power transmitters.

The NBC-sponsored unit is commanded by William B. Busehgen, Captain, Signal Corps-USA, and was organized originally in November, 1948. The regular bi-weekly meetings and technical lectures have been held in NBC's Radio City studios, and other engineering facilities of the network were made available to the unit.

The unit will receive its initial training at Fort Riley, Kans.

Notice

Avoid delays in receiving meeting notices and Society news. Be sure to notify the secretary of any change in your mailing address.

Following are names of members for which we have no current mailing address. Please notify the Secretary, Audio Engineering Society, Box F, Oceanside, N. Y., before the fifth of the month preceding the date of issue.

Positions Open and Available Personnel may be listed here at no charge to industry or to members of the Society. For insertion in this column, brief announcements should be in the hands of the Secretary, Audio Engineering Society, Box F, Oceanside, N. Y., before the fifth of the month preceding the date of issue.

Positions Open
- Positions Wanted

★ Wanted: Approximately 300 electronic and electrical engineers, 20 physicists, and 10 technical writers to staff seven new plants of Westinghouse Electric Corporation. Permanent positions with assured future. Preference for men with minimum of two years experience in research, design or development. Salaries based on experience and ability. Interested engineers should get in touch with nearest Westinghouse office for confidential interview.

★ Wanted: Sylvania Electric has openings for engineers and physicists in all phases of electronic research, design, development, and application. These are permanent positions in a rapidly expanding program, and offer excellent growth possibilities. Several locations. For further information send resume or inquiry to D. W. Currier, Sylvania Electric Products, Inc., 1740 Broadway, New York 17, N. Y.
