COMMITTEE'S GREETING	7
-----------------------------------	---

KEYNOTE ADDRESS	
------------------------------	--

Listening with Two Ears	no manuscript
<i>Lars Risbo, Texas Instruments Denmark, Lyngby, Denmark</i>	

1

INTEGRATION PERSPECTIVES	9
---------------------------------------	---

1-1	A Scalable Class D Audio Amplifier for Low Power Applications	11
	<i>Tony Forzley, Ralph Mason, Carleton University, Ottawa, Ontario, Canada</i>	
1-2	Fully Integrated 600 W Class-D Amplifier with Feedback	21
	<i>Søren Poulsen, Texas Instruments Denmark, Lyngby, Denmark</i>	
1-3	Precision Interleaved Triangle Generation ASIC	29
	<i>Gerald Stanley, Crown International Inc., Elkhart, IN, USA</i>	
1-4	Dynamic Time Offset of Interleaved Modulators	34
	<i>Gerald Stanley, Crown International Inc., Elkhart, IN, USA</i>	
1-5	A Fully Differential Digital Input Class D with EMI Spreading Method for Mobile Application	39
	<i>Remy Cellier, Emmanuel Allier, Angelo Nagari, ST Ericsson, Grenoble, France, Carlo Crippa, Rossella Bassoli, ST Ericsson, Agrate, Italy, Gael Pillonnet, Nacer Abouchi, Institut des Nanotechnologie de Lyon (INL) – CPE Lyon, Lyon, France</i>	

2

POWER STAGE TOPOLOGIES AND IMPLEMENTATION	49
--	----

2-1	Double-Boost DC-AC Converter with Sliding-Mode Control for Portable Audio	50
	<i>Gert B. Maizonave, Michael A. E. Andersen, Claus Kjærgaard, Technical University of Denmark, Kongens Lyngby, Denmark, Kristian L. Lund, Lars B. R. Hansen, Bang & Olufsen ICEpower a/s, Kongens Lyngby, Denmark</i>	
2-2	Realizing the Optimum Performance from a Class D Amplifier Controller IC With Feedback and Feed-Forward Techniques	57
	<i>Brian Attwood, PWM Systems, Crawley, Sussex, UK, Larry Hand, Steven Harris, Jeff Klaas, Borislav Orozov, Skip Taylor, Intersil/D2Audio, Austin, Texas, USA</i>	
2-3	Improve PSRR and Output Power Capability by Using a Boosted Class D Amplifier	67
	<i>Dominique Romeo, ON Semiconductor France</i>	

Contents continued

2-4	Accurate Characterization of Pulse Timing Errors in Class D Audio Amplifier Output Stages72 <i>Francois Koeslag, Toit Mouton, University of Stellenbosch, Western Cape, South Africa</i>
2-5	Output Filter Solutions for Class D Power Amplifiers: Analysis, Characterization, and Recent Developments82 <i>Carlos Ferreira, Beatriz Borges, Luís De Sá, Instituto de Telecomunicações (IT), Portugal</i>
INVITED SPEAKER	
<hr/>	
	Future of Class-D Amplification Technology for IP Audio Systemsno manuscript <i>John Oh, Pulsus Technologies, Seoul, Republic of Korea</i>

3

	METHODS AND TOPOLOGIES93
3-1	A Simple Post-Filter Feedback Topology for Class-D Amplifiers95 <i>Charles Lehmann, Berne, Switzerland</i>
3-2	Globally Modulated Self-Oscillating Amplifier with Improved Linearity101 <i>Bruno Putzeys, Hypex Electronics B.V., Groningen, The Netherlands</i>
3-3	Digital Control of a PWM Switching Amplifier with Global Feedback108 <i>Toit Mouton, University of Stellenbosch, Western Cape, South Africa, Bruno Putzeys, Hypex Electronics B.V., Groningen, The Netherlands</i>
3-4	Multi-Carrier Modulation Audio Power Amplifier with Programmable Logic ..118 <i>Theis Christiansen, Toke Andersen, Arnold Knott, Michael A. E. Andersen, Technical University of Denmark, Kongens Lyngby, Denmark, Gerhard Pfaffinger, Harman/Becker Automotive Systems GmbH, Straubing, Germany</i>

4

	CONTROL/PROTECTION SYSTEM DESIGN128
4-1	A Speaker Protection Scheme for Class D PWM Amplifiers129 <i>Alexandre Huffenus, EASII IC, Grenoble, France, Gael Pillionnet, Institut des Nanotechnologies de Lyon, Villeurbanne, France, Robert Cittadini, Vincent Rabary, Frederic Goutti, ST Microelectronics, Grenoble, France</i>

5

	TESTING AND EVALUATION137
5-1	A Proposed Method of Characterizing Audio Distortion Induced by Power Supply Ripple in Audio Amplifier139 <i>Yang Boon Quek, Texas Instruments Inc, Dallas, TX, USA</i>

6

	SIGNAL PROCESSING	147
6-1	Suppression of Continuous-Time and Discrete-Time Errors in Switch-Mode Control Loops	149
	<i>Lars Risbo</i> , Texas Instruments Denmark, Lyngby, Denmark, <i>Mikkel C. W. Høyerby</i> , Motorola Denmark	
6-2	A New Realization of Linear-Phase Magnitude Complementary Network for Digital Bi-Amplifier	159
	<i>D. Sookcharoenphol</i> , <i>C. Chakreeteeekapakvisit</i> , King's Monkut Institute of Technology, Bangkok, Thailand	
	AUTHORS' INDEX	169
