COMMITTEE'S GREETING.....	7
---------------------------	---

1

MUSIC INFORMATION RETRIEVAL—PART 1.....	9
---	---

1-1	[Invited Paper] New Developments in Music Information Retrieval.....	11
	<i>Meinard Müller, Saarland University and MPI Informatik, Saarbrücken, Germany</i>	
1-2	[Invited Paper] Music Listening in the Future: Augmented Music-Understanding Interfaces and Crowd Music Listening.....	21
	<i>Masataka Goto, National Institute of Advanced Industrial Science and Technology (AIST), Tsukuba, Japan</i>	
1-3	[Invited Paper] Lost in Translation: Transferring Semantic Audio Analysis from the Lab to Industry.....	oral presentation only
	<i>Jay LeBoef, Imagine Research Inc., San Francisco, CA, USA</i>	

P

POSTER SESSION 1.....	31
-----------------------	----

P1-1	Improving a Multiple Pitch Estimation Method with AR Models.....	33
	<i>Tiago Fernandes Taveres, Jayme Garcia Arnal Barbedo, Amauri Lopes, University of Campinas, Campinas, SP, Brazil</i>	
P1-2	Polyphonic Music Transcription Using Weighted CQT and Non-Negative Matrix Factorization.....	39
	<i>Sang Ha Park, Seokjin Lee, Koeng-Mo Sung, Seoul National University, Kwanak-gu, Seoul, Korea</i>	
P1-3	Automatic Classification of Musical Pieces into Global Cultural Areas.....	44
	<i>Anna Kruspe, Hanna Lukashevich, Jakob Abeßer, Holger Großmann, Christian Dittmar, Fraunhofer Institute for Digital Media Technology IDMT, Ilmenau, Germany</i>	
P1-4	Toward Context-Sensitive Music Recommendations Using Multifaceted User Profiles.....	54
	<i>Rafael Schirru, Andreas Dengel, German Research Center for Artificial Intelligence, Kaiserslautern, Germany and University of Kaiserslautern, Kaiserslautern, Germany; Stephan Baumann, German Research Center for Artificial Intelligence, Kaiserslautern, Germany; Christian Freye, Brandenburg University of Applied Sciences, Brandenburg, Germany</i>	
P1-5	Regression-Based Tempo Recognition from Chroma and Energy Accents for Slow Audio Recordings.....	60
	<i>Thorsten Deinert, Igor Vatonkin, Günter Rudolph, TU Dortmund, Dortmund, Germany</i>	
P1-6	Blind Estimation of Reverberation Time from Monophonic Instrument Recordings Based on Non-Negative Matrix Factorization.....	69
	<i>Maximo Cobos, Jose J. Lopez, Universitat Politecnica de Valencia, Valencia, Spain; Pedro Vera-Candeas, Julio Jose Carabias-Orti, Nicolas Ruiz-Reyes, Universidad de Jaen, Linares, Spain</i>	

Contents *continued*

- P1-7 **Observing Uncertainty in Music Tagging by Automatic Gaze Tracking**79
Bozena Kostek, Gdansk University of Technology, Gdansk, Poland

2

SPEECH PROCESSING AND ANALYSIS87

- 2-1 **[Invited Paper] Semantic Speech Tagging: Toward Combined Analysis of Speaker Traits**.....89
Björn Schuller, Martin Wöllmer, Florian Eyben, Gerhard Rigoll, Technische Universität München, Munich, Germany; *Dejan Arsic*, Müller-BBM Vibroakustiksysteme, Planegg, Germany
- 2-2 **SynCTS: Automatic Synchronization of Speech and Text Documents**.....98
David Damm, Harald Grohgan, Sebastian Ewert, Michael Clausen, University of Bonn, Bonn, Germany; *Frank Kurth*, Fraunhofer Institute for Communication, Information Processing and Ergonomics (FKIE), Wachtberg, Germany
- 2-3 **Extraction of Spectro-Temporal Speech Cues for Robust Automatic Speech Recognition**108
Bernd T. Meyer, International Computer Science Institute (ICSI), Berkeley, CA, USA

3

AUTOMATIC MUSIC TRANSCRIPTION119

- 3-1 **Automatic Recognition and Parametrization of Frequency Modulation Techniques in Bass Guitar Recordings**121
Jakob Abeßer, Christian Dittmar, Fraunhofer Institute for Digital Media Technology, IDMT, Ilmenau Germany; *Gerald Schuller*, Ilmenau University of Technology, Ilmenau, Germany
- 3-2 **Note Clustering Based on 2-D Source-Filter Modeling for Underdetermined Blind Source Separation**129
Martin Spiertz, Volker Gnann, RWTH Aachen University, Aachen, Germany
- 3-3 **Pitch Estimation by the Pair-Wise Evaluation of Spectral Peaks**137
Karin Dressler, Fraunhofer Institute for Digital Media Technology, IDMT, Ilmenau Germany

4

INFORMED SOURCE SEPARATION.....147

- 4-1 **[Invited Paper] Parametric Coding of Audio Objects: Technology, Performance and Opportunities**149
Jürgen Herre, International Audio Laboratories Erlangen (a joint institution of Fraunhofer IIS and University of Erlangen-Nürnberg), Erlangen, Germany; *Leon Terentiv*, Fraunhofer Institute for Integrated Circuits IIS, Erlangen, Germany
- 4-2 **Informed Audio Source Separation from Compressed Linear Stereo Mixtures**159
Laurent Girin, Jonathan Pinel, Grenoble Laboratory of Images, Speech, Signal and Automation (GIPSA-lab), Grenoble, France
- 4-3 **Compressive Sensing for Mудic Signals: Comparison of Transforms with Coherent Dictionaries**.....169
Ch. Srikanth Raj, T. V. Sreenivas, Indian Institute of Science, Bangalor, India

Contents *continued*

- 4-4 “Sparsification” of Audio Signals Using the MDCT/IntMDCT and a Psychoacoustic Model—Application to Informed Audio Source Separation179
Jonathan Pinel, Laurent Girin, Grenoble Laboratory of Images, Speech, Signal and Automation (GIPSA-lab), Grenoble, France

P

POSTER SESSION 2.....189

- P2-1 A Psychoacoustic Approach to Wave Field Synthesis191
Tim Ziemer, University of Hamburg, Hamburg, Germany
- P2-2 Comparative Evaluation and Combination of Audio Tempo Estimation Approaches198
Jose R. Zapata and Emilia Gómez, Universitat Pompeu Fabra, Barcelona, Spain
- P2-3 Tempo Estimation from Urban Music Using Non-Negative Matrix Factorization208
Daniel Gärtner, Fraunhofer Institute for Digital Media Technology IDMT, Ilmenau, Germany
- P2-4 A Musical Source Separation System Using a Source-Filter Model and Beta-Divergence Non-Negative Matrix Factorization216
Seokjin Lee, SangHa Park, Koeng-Mo Sung, Seoul National University, Kwanak-gu, Seoul, Korea
- P2-5 Design of a Karaoke System for Commercial Stereophonic Audio Tracks Aiming a Musical Learning Aid for Amateur Singers221
Karthik. R, Jeyasingh Pathrose, Jasmin Infotech Pvt. Ltd., Chennai, India; M. Madheswaran, Muthayammal Engineering College, Rasipuram, India
- P2-6 Geometric Source Separation Method of Audio Signals Based on Beamforming and NMFs228
Seokjin Lee, Sang Ha Park, Koeng-Mo Sung, Seoul National University, Kwanak-gu, Seoul, Korea

5

AUDIO SOURCE SEPARATION.....237

- 5-1 Singing Voice Separation from Stereo Recordings Using Spatial Clues and Robust F0 Estimation239
Pablo Cabañas-Molero, Damián Martínez-Muñoz, University of Jaen, Linares Jaén, Spain; Maximo Cobos, José J. López, Technical University of Valencia, Valencia, Spain
- 5-2 Influence of Phase, Magnitude and Location of Harmonic Components in the Perceived Quality of Extracted Solo Signals247
Estefanía Cano, Christian Dittmar, Gerald Schuller, Fraunhofer Institute for Digital Media Technology IDMT, Ilmenau, Germany

6

MUSIC INFORMATION RETRIEVAL—PART 2.....253

- 6-1 Expressivity in Musical Timing in Relation to Musical Structure and Interpretation: A Cross-Performance, Audio-Based Approach255
Cynthia C. S. Liem, Alan Hanjalic, Delft University of Technology, Delft, The Netherlands; Craig Stuart Sapp, CCRMA/CCARH, Stanford University, Stanford, CA, USA

Contents *continued*

- 6-2 **Interactive Classification of Sound Objects for Polyphonic Electro-Acoustic Music Annotation**.....265
Sebastien Gulluni, Institut National de l'Audiovisuel, Bry-sur-marne Cedex, France and Telecom ParisTech, Paris, France; *Slim Essid, Gaël Richard*, Telecom ParisTech, Paris, France; *Olivier Buisson*, Institut National de l'Audiovisuel, Bry-sur-marne Cedex, France

7

MUSIC INFORMATION RETRIEVAL—PART 3.....273

- 7-1 **[Invited Paper] Adaptive Distance Measures for Exploration and Structuring of Music Collections**275
Sebastian Stober, Otto-von-Guericke-University Magdeburg, Magdeburg, Germany
- 7-2 **Analyzing Chroma Feature Types for Automated Chord Recognition**285
Nanzhu Jiang, Peter Grosche, Verena Konz, Meinard Müller, Saarland University and MPI Informatik, Saarbrücken, Germany

8

INTELLIGENT AUDIO EFFECTS295

- 8-1 **[Invited Paper] Surround Recording Based on a Coincident Pair of Microphones**.....297
Christof Faller, ILLUSONIC LLC, St-Sulpice, Switzerland
- 8-2 **A Knowledge Representation Framework for Context-Dependent Audio Processing** .305
György Fazekas, Thomas Wilmering, Mark B. Sandler, Queen Mary University of London, London, UK

AUTHORS' INDEX:.....315
