

**Minutes of the 92/03/26 meeting of AES Technical  
Committee on Acoustics and Sound Reinforcement at the  
AES 92nd Convention in Vienna**

Attending: Mendel Kleiner (ch), Daniel Queen, Wolfgang Ahnert (m), Gerhardt Steinke, Wolfgang Hoeg, Gerrit Duran, Neil Grant.

The meeting started by Mendel Kleiner who introduced the committee and its purpose. Mendel Kleiner also described the work of the committee in preparation of the AES convention in San Fransisco.

This was followed by a general discussion on what could be done for next years European convention in Berlin. Wolfgang Ahnert expressed concern that the activities in preparing special sessions were concentrated on arranging sessions at the US conventions. Many of those attending expressed themselves prepared to take on some work in arranging sessions or workshops at the Berlin convention. Suggestions for topics included: Auralization, Control of Regenerative Feedback in Sound Reinforcement Systems, Localization, Psychoacoustics of Reverberation Systems, Room Impression in Sound Reinforcement Systems, Steerable Arrays, Acoustic Conditions for Small Room Monitoring for HDTV.

Mendel Kleiner will contact those prepared to help in arranging sessions.
