

EDITOR'S REPORT

WITH OUR AUTHORS

● WINSTON WELLS has recovered from his illness and his next article on the design of electronic organs will appear in our March issue. C. J. LeBel and Norman Pickering dropped in to tell how well they are progressing in organizing an audio engineering society. Had lunch with Howard Chinn and Bob Monroe of CBS. Howard has in preparation an excellent series of books on audio engineering which we hope to start publishing in the near future. From KSL comes word of a new noise suppressor with many outstanding features. An article on it will appear in an early issue.
