

Meeting TC-MA, 25.05.2018, during the 144<sup>th</sup> AES Convention, Milan.

Participants:

- Helmut Wittek, Schoeps, chair
- Eddy Brixen, ebb consult
- Martin Schneider, Neumann
- Hans Riekehof-Böhmer, Schoeps
- Hans van Maanen, Temporal Coherence
- Balazs Kakonyi, Harman
- Orosz Tibor, Harman
- Pablo Diego, Harman

Topics:

#### 1. Members of the TC

The chair depicted the way in which the list of TC-MA members (=the members of the TC-MA mailing list) is being updated. An email was written to all TC-MA members to which a reply was necessary in order to remain on the list. There was an outcome of 15 “Yes” and 1 “No” from 51 members. The chair will send another mail before finally deleting the non-responders.

During the TC Plenary it was discussed whether a second email list (the “followers”) was possible and feasible in the future.

#### 2. Discussion of the temporal properties of microphones

Mr. van Maanen suggested that the TC should discuss the temporal properties of microphones, as he thinks it is an important quality criterion which is not covered sufficiently. The microphone manufacturers amongst the present members agreed that they would support an investigation in this direction, if performed/initialized by Mr. van Maanen.

#### 3. Workshops

As the meeting was before the last day of the convention, we could not yet discuss the “Spatial Audio Microphones” workshop. The “Mic Spec” workshop was attended well and should be repeated.

H. Wittek, 04.06.2018
